

# ROLLER LEVELS

RL66 | RL84

**WORKSITE PRO**

COMMERCIAL WORKSITE PRODUCTS

## SPECIFICATIONS

# RL66 / RL84

- Worksite Pro™ Roller Levels deliver reliable, cost-efficient productivity for finish-grade work.
- Designed for minimal maintenance and maximum uptime with only two greaseable bearings, two replaceable cutting edges, and no hydraulics.
- Roller pulverizes clumps and clods for a smoother finish in loose soil.
- Front roller position offers unobstructed visibility and provides total control when contouring, grading, cutting, and smoothing flat or significantly sloped terrain.
- Front and rear cutting edges make quick work of tough site-prep and grading tasks. Use either or both edges to spread loose material and for quickly cutting or scraping hard-pack without disturbing the base below.
- Like all Worksite Pro attachments, these roller levels are optimized to perform with John Deere skid steers and compact track loaders, and are compatible with most competitive models. Plus, they're backed by a one-year warranty and one-of-a-kind parts and service. See your local John Deere skid steer dealer for details.
